

Note:  
All framing is made of 2"x6" alum.  
Square tube 1/8" wall.  
All connections are welded.  
See attached certification.

Wind Speed of 120 mph.  
Exposure category B  
Importance Factor 1.0  
Internal Pressure -0.18  
Wind Pressure +/- 34 psf.

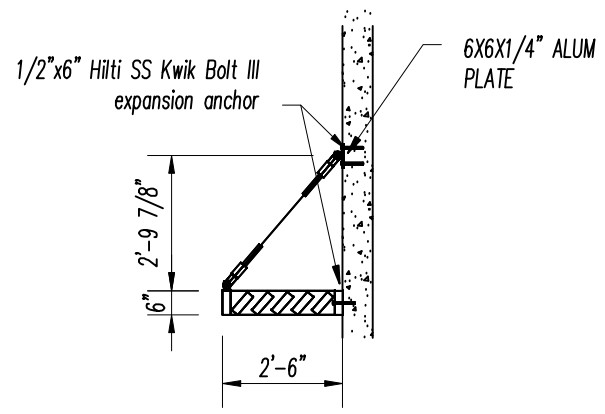

Note:  
This certifies that these plans meet or exceed the 120 mph, 3 second gust, wind load requirements of Chapter #16 2004 Edition or the Florida building code with 2006 ammendments.  
This also meet the 100 mph sustained wind requirements.
