PRECISION LABORATORY SETS

OIML CLASSIFICATION

Designed specifically for calibrating balances, calibrating weights, laboratory use, and as mass standards, our high-precision calibration weights provide ultimate accuracy and easy handling.

Calibrated weights are traceable to the International System of Units (S.I.) through National Institute of Standards and Technology (NIST) or National Physical Lab (NPL). Weights are manufactured to OIML R111-1, 2004 guidelines.

To ensure the highest measurement standards, Rice Lake holds memberships and actively participates in the following organizations:

- National Voluntary Laboratory Accreditation Program
- NIST Mass Measurement Assurance Program
- National Conference on Standards Laboratories
- National Conference on Weights and Measures
- International Society of Weighing and Measurement
