

TruCedar® Steel Siding

Shake Sidewall

Shown in Cedar

TruCedar®
Shake Siding

Features

Sidewall panels are comprised of more than just steel: three protective layers on the front and one on the back work in harmony to ensure superior endurance and protection.

Solid Painted Back
Every surface
is covered.

PVDF Paint System

Featuring a PVDF Paint System that ensures exceptional fade protection.

Zinc Phosphate

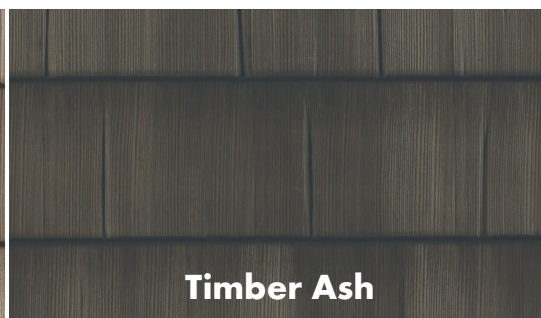

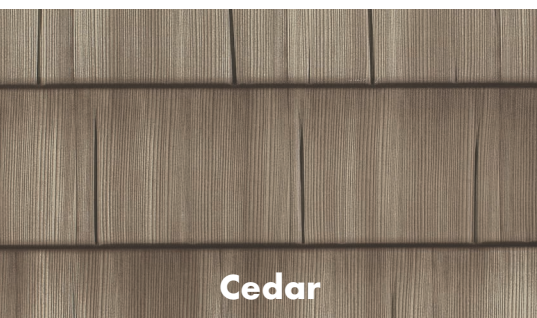

An additional anti-corrosive layer that provides a superior bond for the paint system.

Thermally Deposited Anti-Corrosive G90 Coating

DDS High-Performance Steel Alloy

TruCedar® Shake Sidewall provides the look of real Cedar Shakes without the maintenance. It's color palette was chosen to simulate the look of real cedar wood shakes in various stages of aging and can be used as an accent for dormers, peaks, under porches or as a whole house application.

Color Palette

Each TruCedar® Shake Sidewall color is available in a full line of matching siding accessories.
