

**DOES WORK
MAKE YOU
SICK?**

**The Culprit May be
LURKING In Your Air Ducts!**

*The Northeast's Largest
Air Cleaning Specialists*

Mr. Power Clean says, "Call today and breathe easier tomorrow."

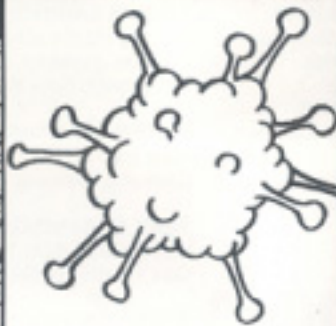

What You Can't See Can Hurt You!

BACTERIA

POLLEN

VIRUS

DUST MITE

Is Your Coffee Contaminated?

Recent studies have revealed some alarming statistics about indoor air pollution, both at home and at work; it may be 10 to 100 times worse than the air outside! The continual rain of dust and dirt gets into the lungs, settles on food and clothing, providing an uncomfortable and unwholesome atmosphere that can lead to:

- *Headaches and nausea*
- *Grogginess and fatigue*
- *Skin irritation*
- *Burning sensations in the nose, throat, eyes*
- *Tightness of the chest*
- *A high rate of job absenteeism*

The moisture and debris commonly found in HVAC systems provide an ideal breeding ground for mold, germs, fungi and other harmful microbes. Airborne contaminants are drawn through the duct work of the central air conditioning system via return air grilles. Standard, throw-away filters remove less than 7% of these particles; the rest settles in your air ducts!

A variety of health problems and infectious diseases are known to originate in, and be spread by, contaminated ventilation systems. These include:

- *Asthma*
- *Allergies*
- *General respiratory problems*
- *Deadly "Legionnaire's Disease"*

Are Dirt and Dust Causing You Downtime?

The same pollutants which cause your workers illness and discomfort also settle in and on your equipment and machinery. The result:

- *Frequent Breakdowns*
- *Costly Maintenance and Repairs*
- *Lost Productivity*

Is a Time-bomb Ticking in Your Factory?

Fire and explosions can erupt without warning when a static spark ignites combustible dust or lint in ducts. Fire can then spread so fast that sprinklers and fire fighting equipment are often rendered helpless.

Industrial Power Clean Removes the Source of These Workplace Hazards!

As industry leaders for over 52 years, we have the knowledge and resources to assess and eliminate even the toughest pollution problems. Using state-of-the-art high power vacuum equipment, we will clean, sanitize and seal air ducts in any home, office or industrial site from a single story building to a high-rise complex.

INDUSTRIAL POWER CLEAN ALSO OFFERS ONE STOP SERVICE FOR ALL YOUR INDUSTRIAL CLEANING NEEDS

HEATING, VENTILATING, AIR CONDITIONING SYSTEM CLEANING: Ducts, Coils, Fans, Diffusers

EXHAUST SYSTEMS: Cafeteria, Machine, Restaurant, Etc.

POWER VACUUMING: Superstructure, Roofs, Silos, Dust Collectors & Ducts
Material Transfer (We pick up spills)

BOILERS (Fire & Water Side): Breechings, Chimneys, Ovens, Heaters,
Machinery

ACID CLEANING: Boilers, Heat Exchangers, Process Systems, Jacketed
Equipment, New Pipe Pickling

WATER BLASTING: Heat Exchangers, Surface Cleaning, Sewers, Boiler Tubes

EXTERIOR BUILDING CLEANING: Stone, Brick, Stucco and Aluminum Siding

DRYER VENT CLEANING
