Did you know that the Insurance Industry considers the Tree Industry high risk?

Did you know that the Tree Service Industry is in the top 5 of the most dangerous professions?

Did you know that if the company you hire does not carry Workman's Compensation, you are responsible for their injuries and medical bills if they are injured on your property at the time of the accident.

Did you know that the contractors general liability insurance covers repairs to your home and/or your neighbor's home should any property be damaged during Tree Service?

Below is a small check list to consider before selecting a Tree Service:

- Does the company providing the Tree Service have proper liability and Worker's Compensation Insurance? Ask for a certificate of Insurance for both General Liability and Worker's Compensation Insurance.
- Ask for the telephone numbers of the Insurance provider.
- Call the Insurance providers and confirm they carry General Liability and Worker's Compensation and that both are current and valid.
- Be sure that the company you hire carries the proper insurance and that the company also is a Certified Arborist.

Also, some things to remember when hiring any service. To protect you and your assets, be sure hired services are insured with Worker's Compensation, may it be painters, electricians, Lawn Service, etc.

*Thank you for calling Bay City Tree Service, Inc. to inspect your trees.*
