

Our elementary school program offers our children an advanced curriculum geared to challenge their minds and keep them excited about learning. Our classes study mathematics including continuing addition and subtraction, multiplication, place values, odd and even numbers, and countless other skills. Through daily seatwork and review we keep cursive writing consistent in our classrooms. The students work on spelling, phonics and reading, language and poetry, mathematics and history and geography daily. Our teachers expand on our God's World science curriculum incorporating measurements, experiments and other activities to help them better understand the lessons. Through continuing bible studies and weekly chapel we instill strong Christian values. Lastly our Spanish class and map studies and lessons on The People Who Built America our teachers keep students interested and eager to expand their knowledge!

FIRST GRADE ACCOMPLISHMENT GUIDE
