

INTRODUCTION TO GREEN PRODUCTS:

MAKING SENSE OF GREEN PRODUCTS

THIS GUIDE OR "INDEX" OF THE "GREEN" PRODUCTS WITHIN THIS CATALOG IS DESIGNED TO HELP YOU DECIDE WHAT ENVIRONMENTALLY FRIENDLY PRODUCTS TO CHOOSE FOR YOUR GREEN CLEANING PROGRAM. MANY OF THESE PRODUCTS USE EARTH FRIENDLY "GREEN CHEMISTRY" WHICH ARE LOW IN TOXICITY, SUSTAINABLE AND NON-HAZARDOUS TO THE ENVIRONMENT, PEOPLE AND ANIMALS THAT WILL COME IN CONTACT WITH THEM. OTHERS HAVE PASSED TESTING BY THE AGENCIES LISTED BELOW AND ACHIEVED THEIR CERTIFICATIONS WHICH PROVIDE STANDARDS, TESTING AND COMPLIANCE INFORMATION THAT YOUR FACILITY MAY REQUIRE. OUR GOAL IS TO PROVIDE YOU WITH A VARIETY OF CHOICES SO THAT YOU CAN CREATE A PROGRAM THAT WORKS FOR YOU. WE INVITE YOUR QUESTIONS & COMMENTS.

LET US HELP YOU GO GREEN!

DIFFERENT CERTIFICATIONS

E.P.P.:

Handy Klenz EPP - Environmentally Preferred Products meet or exceed standards which in many ways positively effect the environment and/or replace equal or similar products with newer more sustainable products. Many of these formulations meet or exceed requirements to be certified by the agencies listed below but save you money by not incurring the certification costs.

DfE:

The Design for the Environment (DfE) Program works in partnership with a broad range of stakeholders to reduce risk to people and the environment by preventing pollution. DfE focuses on industries that combine the potential for chemical risk reduction and improvements in energy efficiency with a strong motivation to make lasting, positive changes. DfE convenes partners, including industry representatives and environmental groups, to develop goals and guide the work of the partnership. Partnership projects evaluate the human health and environmental considerations, performance, and cost of traditional and alternative technologies, materials, and processes. As incentives for participation and driving change, DfE offers unique technical tools, methodologies, and expertise.

GREEN SEAL:

The Green Seal is awarded to products that have less impact on the environment and work well. To earn the Green Seal a product must meet the Green Seal environmental standard for the category as demonstrated by rigorous evaluation and testing. Green Seal standards are set so that they identify the most environmentally preferable products currently available; thus, they are leadership standards.

LEED:

LEED is a third-party certification program and the nationally accepted benchmark for the design, construction and operation of high performance green buildings. LEED gives building owners and operators the tools they need to have an immediate and measurable impact on their buildings' performance. LEED promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality.

OTHER:

Many other Companies have taken the lead in offering environmentally friendly products. They use the newest technology available to create products that are environmentally Friendly.
