

Conflict Minerals Declaration

The Dodd-Frank Wall Street Reform and Consumer Protection Act was signed into U.S. federal law on July 21, 2010. Section 1502 of the Act defines the reporting obligations for companies that are publicly traded in the US and are governed by the Securities & Exchange Commission (SEC). Section 1502 requires companies that make products for which 3TG minerals (tantalum, tin, tungsten and gold) are necessary to the functionality or production of that product to assess their supply chains and publically report on the source of these minerals if they are sourced from the Democratic Republic of Congo (DRC) or adjoining country or if they are from recycled or scrap sources.

Seminole Metal Finishing, Inc. at this time does not have any products or services that contain 3TG minerals, and therefore remains unaffected by this law. If our products and/or services should include any Conflict Minerals in the future this declaration will be updated, and our customers notified. Although Seminole Metal Finishing, Inc. is not a publically traded company, and therefore not directly subject to this law, we are providing this information to our customers to help them comply with any obligations relative to this law.
