About Us

Greenstar Environmental Solutions, LLC
DUNS NO. 61097787
CAGE code 47MD1

Greenstar is an environmental consulting firm with offices in New York and New Jersey. Greenstar has extensive experience with environmental sites of all size and complexity. Our staff has experience working on sites for Industrial and Commercial facilities, State Agencies, the U.S. Department of Defense including environmental sites at active Navy, Army and Air Force bases, the U.S. Department of Energy, Superfund Sites, active landfills, and sites operated by local and county governments. This wide range of experience allows Greenstar to offer the most appropriate solutions to every environmental issue.

Experience

Current project experience includes:

1. A soil remediation project for a private client in NJ involving the characterization, excavation, transportation and disposal of 10,500 tons of contaminated soils. Greenstar completed the project \$2M under budget.
2. A pilot study to gauge the effectiveness of nanoscale zero valent iron to remediate ground water in a fractured bedrock aquifer impacted by chlorinated solvents.
3. Groundwater modeling and active bedrock pumping to assess the applicability of capturing groundwater from the bedrock aquifer to prevent migration into an unlined inactive hazardous waste landfill. Success of the pilot study could reduce long-term OM&M costs by millions of dollars.

Our Small Business Certifications

Greenstar has several Federal and State small business certifications. We can help meet your Federal WOSB and EDWOSB contracting goals for contracts with local and NYS agencies or Federal contracts.

Our Services

- Site Investigation
- Sampling of Soil, Groundwater, and Soil Vapor
- Treatment Systems Operations and Maintenance
- Soil and Groundwater Remediation
- Groundwater Flow Monitoring
- Contaminant Transport Modeling
- Database and GIS
- Data Visualization
- Risk Assessment
- Indoor Air and Soil Vapor Assessment
- Sub-Slab Vapor Remediation
- Environmental Engineering
- Underground/Above Ground
- Storage Tank Closure
- State and Federal Regulations
- Ground Penetrating Radar for locating utilities and tanks

Our Mission

Our mission is to provide clients a wide-range of engineering and environmental services to facilitate investigation and remediation of environmental sites. Achieving a high-level of client service and technical excellence for every project is our top priority.
