Range with R7 receiver ....... 2000’ dia., 1000’ rad. (610m/305m)
XD range with R8 receiver ... 3300’ dia., 1650’ rad. (1km/500m)
Accuracy ................................ ± 10 arc sec. (± 1/16” per 100’)
 ........................................... (± 1.5mm per 30m)
Leveling technology • Range .... Servo motor • ± 5 degrees
Slope matching • Range ........ Single axis, X-axis self-leveled - 8%
Height alert ......................... Normally active, can be disabled
Rotation coverage • speed ...... 360° • 600 or 1200rpm, selectable
Machine control compatible .... Yes, including high speed rotation
Warranty ............................ 24 Month defects coverage
Power source • Life .............. Four C-cells • 100 hrs. (alkaline)
Rechargeable bats. • Life ...... Optional Ni-Mh kit • 65 hrs.
Laser beam type .................... Visible 635nm
Alpha laser classification ....... CDRH and IEC Class 2
XD Laser classification ......... CDRH class IIa • IEC class 3R
Dust and water sealed .......... To international standard IP56
Operating temperature ........... 4°F to +140°F (-20°C to +60°C)
Built to be jobsite tough ......... Designed to take a 3ft (1m) drop or 5ft
 ................................................... (1.5m) tripod knock-over on concrete

When you need extreme distance, the Alpha XD is ready.
All the great performance and features of the regular Alpha, plus a range of 3300ft (1km) diameter.

• Agricultural land leveling
• Long distance elevation reference and grading
