Getting to Grips with Gloves

	Glove Type Disposable/Single Use	Material Vinyl, PVC, Latex, Nitrile	Uses Small parts handling, food handling, medical & lab use, manufacturing. Nitrile is a good choice for those with latex allergies. Suitable for light-duty tasks.	Page(s) 271-276
	Knit	Cotton/ Polyester	Use as a liner or for additional protection and grip. Suitable for light-duty tasks.	282-283
	Driver's	Cowhide, Pigskin, Goatskin	Use for abrasion resistance, general use. Suitable for medium-duty tasks.	284-286
	Canvas & Fabric	Cotton	General purpose. Suitable for light- to medium-duty tasks.	282-283, 285
	Supported/Dipped	Typically Knit with foam Nitrile, Polyurethane or PVC	Chemical processing/handling, cleaning, oil refining, food processing. Suitable for medium- to heavy-duty tasks.	277-281
	Specialty	Lined & unlined Neoprene, Nitrile, Nylon	Rough, oily, abrasive, hot or cold environments. Suitable for heavy-duty tasks.	285-286

Glove Types

Disposable/Single Use – Gloves from these materials are economical, often disposable and appropriate for general use. Users can find these materials made into gloves that are approved for a variety of settings.

Knit – Knit gloves offer comfortable fit and good flexibility and can also be used as a liner for extra protection. Look for gloves featuring PVC dots for extra grip.

Driver's – Excellent strength and durability combined with comfort and protection. Look for designs with shirred or elasticized cuffs when you are concerned about keeping dirt and debris out of the glove. Provides abrasion resistance, dexterity, durability and comfort.

Canvas & Fabric – Provides durability, dexterity and comfort. Look for palms featuring PVC dots or natural or synthetic hide when greater grip is needed. These gloves can typically be laundered. When sturdy synthetic fabric is used, durability is increased along with resistance to abrasions, cuts and punctures.

Supported/Dipped – Degrees of protection vary, with coatings to protect against solvents and chemicals and provide protection from abrasions, punctures and cuts.

Specialty – Box handling and other heavy-duty applications that might require exceptional dexterity, grip, and imperviousness to liquids, impact cushioning and other protection. Specialty gloves feature palms, coatings and materials and thicknesses designed for the most demanding users.

Ansell**A. Dura-Touch® PVC Gloves**

Disposable, multipurpose gloves. Made from premium quality PVC for extra durability. Complies with FDA food handling requirements. Powdered. Clear. 100 gloves per box.

We've Got it Covered: Eye Protection

Personal protective eyewear, such as goggles and safety glasses, must be used in a workplace where an eye hazard exists.

Each day approximately 2,000 U.S. workers sustain an eye injury on the job that requires medical treatment. A third of the injuries are treated in hospital ERs and more than 100 of these injuries result in a day or more of lost work. The majority of these injuries results from small particles or objects striking or abrading the eye.

When choosing eye protection, you'll want to analyze and identify the hazards of your workplace. Then, the choice can be made between safety glasses, goggles or a combination of a faceshield with glasses or goggles as secondary protection.

Eye protection should be fit to the worker or adjustable to provide for appropriate coverage. The worker's personal vision needs to come into play, with safety glasses that allow the user to wear their own glasses underneath.

You'll want to see good eye protection at work in your environment. Make informed choices and be safe.

www.cdc.gov/niosh/topics/eye

Safety Glasses

Safety glasses protect against general impact. However, the speed of the impact must be taken into consideration. The higher the velocity, the more likely the safety glasses can be dislodged. In this case, goggles or a faceshield may be a better choice.

Goggles

Goggles are available in two styles. Direct vented or indirect vented.

Indirect Vented goggles are for protection against vapors, chemicals, liquids and dust.

Direct Vented goggles provide air flow to the eye area but are only approved for protection against particulates. These are for jobs such as grinding or cutting where dust is an issue.

Faceshields

A full faceshield is the best option for workers exposed to high speed flying particles or chemical splashes. These must be used in conjunction with safety glasses or goggles to protect against secondary hazards.

UV Protection

Crucial for workers exposed to ultraviolet radiation such as outdoor workers and welders.

Lens Coatings/Colors

Eye protection is available in a variety of coatings and lens colors.

Hard-coated for applications where lens scratching is an issue.

Anti-Fog/Anti-Mist for jobs where workers are exposed to extremes of temperature or warm humid environments.

Clear Lenses for indoor or outdoor applications in below normal light conditions.

Gray or Brown Lenses for outdoor use where above average light is available.

Amber Lenses for applications where light conditions are below normal or where enhanced contrast is needed.

Eye Care & Protection

**A. Klondike® Protective Eyewear**

Gel nose piece for long wearing comfort. Adjustable temples ensure comfortable fit for male and female wearers. Shell offers built in chin protection and extended top of head coverage. Highly adjustable headgear tilts visor nearer or farther from face depending on preference and application. Comfortable cell foam on back of headgear. Breathable, removable, washable headband. Comfortably worn with most goggles and respirators. Passes ANSI Z87+ and CSA Z94.3 standards. No metal parts. Uncoated visor. Clear polycarbonate. Black matte shell. 4 face shields per case.

UVX S8500 Case

Get Some Air: Using Respirators

The National Institute of Occupational Safety and Health, NIOSH, collaborates with industry partners and other government units to develop respirator standards in accordance with government regulations. Look for the NIOSH code that describes the standard appropriate to your workplace. Respirators reduce worker exposures when engineering control systems, such as ventilation and scrubbing systems, cannot. Employers can require workers to wear respirators to perform some tasks. Approximately five percent of all U.S. workers, in about 20 percent of all work establishments, wear respirators at least some of the time.

Particulate Respirators

Particulate filters are available in disposable or reusable models with replaceable filters. They cover the nose and mouth and provide protection from airborne particles including dust, mist, liquids and some fumes but not gases or vapors. They are rated by NIOSH according to what and how much they filter out. The ratings have a letter and number.

N – not oil proof

R – oil resistant (up to 8 hours)

P – oil proof (beyond 8 hours)

The numbers refer to the percentage of one-micrometer particles removed during trials. For example, a 95 rating indicates that the filter removes 95% of particles from the air.

Chemical Cartridge/Gas Mask Respirators

Chemical Cartridge/Gas Mask Respirators contain replaceable carbon filters that absorb gas and vapor from the air. Reusable masks seal tightly around the edges to block out unfiltered air. Choose from Half-Mask, covering only nose and mouth, or Full-Mask, covering your entire face.

Several types of cartridge are available. These include chemical (blocks out vapors but not particles) and dual cartridge (includes a replaceable pre-filter for particulates).

N95 PARTICULATE RESPIRATORS

Meets heat and flame resistance with ANSI/ISEA 110 2003 section 7.11.1.

2200 and 2300 Series N95 Particulate Respirators

Dura Mesh® shell resists collapsing in heat and humidity. Suitable for welding. Two strap. Medium/Large.

No.	Qty./Box	Box
A. MLX 2300N95*	10 per box	
B. MLX 2200N95	20 per box	

*Equipped with exhalation valve

C. 2400 Series N95 Particulate Respirators

Added carbon layer helps filter out nuisance levels of ozone and organic vapors (less than OSHA PEL). Dura Mesh® shell resists collapsing in heat and humidity. Includes exhalation valve. Two strap. Medium/Large. 10 per pack.

MLX 2400N95	Pack
-------------	------

D. 2700 Series N95 Particulate Respirators

HandyStrap® allows mask to hang comfortably around neck when not in use. Includes exhalation valve. Medium/Large. 10 per box.

MLX 2700N95	Box
-------------	-----

3M

P95 Particulate Respirators

P95 particulate respirators filter at least 95% of airborne particles and are strongly resistant to oil. Cool Flow™ one way exhalation valve for cool dry comfort. Adjustable M noseclip. Faceseal is comfortable to wear and contours easily to help provide a good seal. Lightweight construction. Braided straps. Meets NIOSH requirements. 10 respirators per box.

No.	Box
E. Ideal for grinding, sanding, sweeping, bagging, machining and dusty or oily operations.	
MCO 54285	

F. Ideal in foundry operations, lab settings, agriculture, petrochemical manufacturing, undercoating. Carbon layer reduces exposure to nuisance levels of organic vapors.

MCO 54371	
-----------	--

G. R95 Particulate Respirators

R95 particulate respirators filter at least 95% of airborne particles and are somewhat resistant to oil. Ideal for foundry operations, lab settings, agriculture, undercoating and petrochemical processing. Carbon layer reduces exposure to nuisance levels of organic vapors. Lightweight construction promotes greater worker comfort and contributes to increased wear time. Soft nose foam. Fixed strap. Meets NIOSH requirements. 20 respirators per box. 6 boxes per case.

MCO 54358	Case
