

# SPICER®

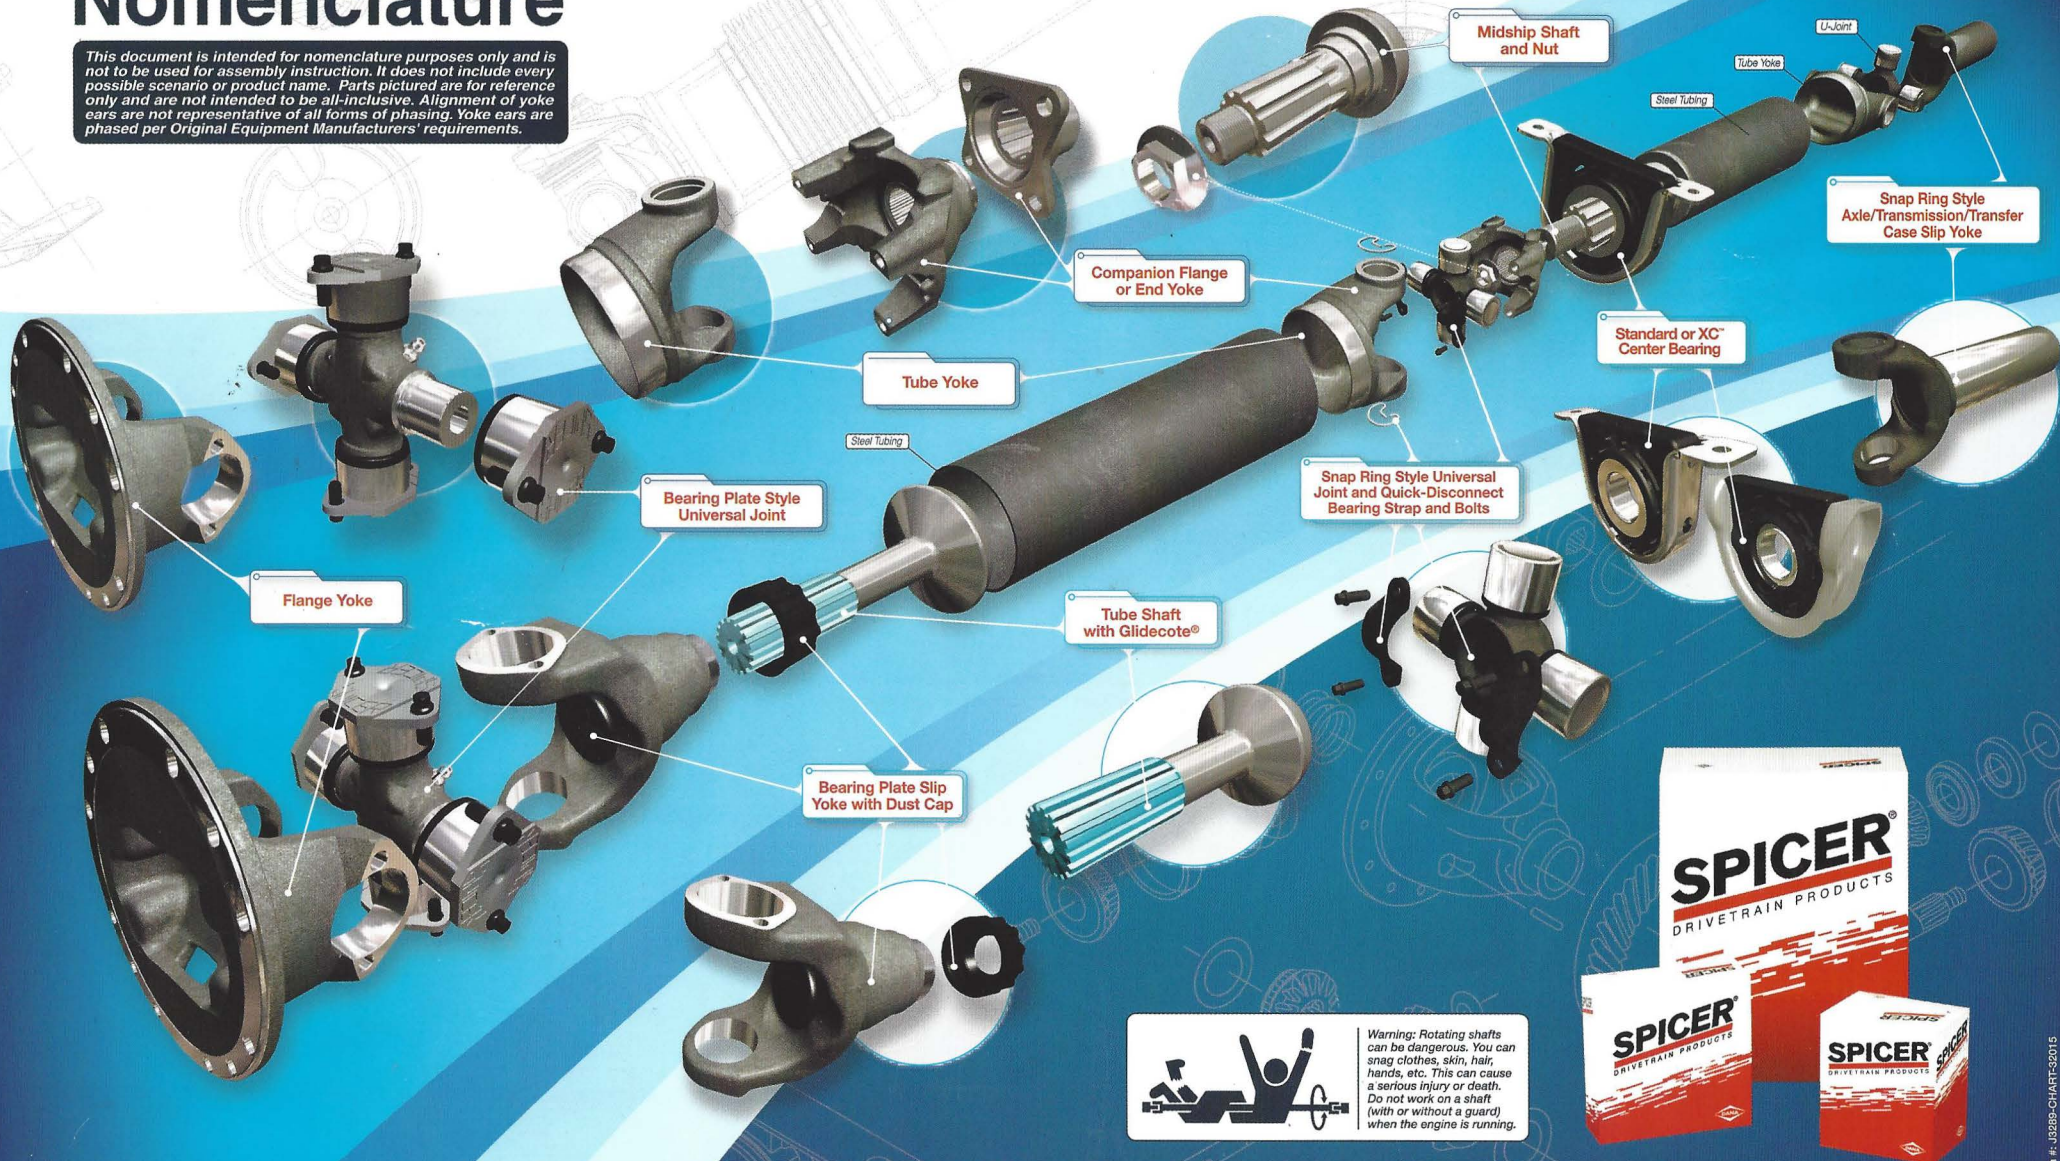

# 10 Series™ Driveshaft Components

There is no substitute for genuine Spicer® driveshaft components.

Don't risk your vehicle's performance on unproven replacement parts. Only genuine Spicer parts are manufactured to the exact original equipment standards set forth by Dana, the global leader in driveline components. Spicer parts are engineered to adhere to deliver the same level of quality you expect from parts installed in a brand-new vehicle. You can count on the Spicer name to ensure less drivetrain vibration, improved balance and stiffness, and better lateral protection against contaminants. Don't settle for a knock-off aftermarket replacement part—demand genuine Spicer parts.

## Nomenclature

This document is intended for nomenclature purposes only and is not to be used for assembly instruction. It does not include every possible scenario or product name. Parts pictured are for reference only and are not intended to be all-inclusive. Alignment of yoke ears are not representative of all forms of phasing. Yoke ears are phased per Original Equipment Manufacturers' requirements.

Warning: Rotating shafts can be dangerous. You can snag clothes, skin, hair, hands, etc. This can cause a serious injury or death. Do not work on a shaft (with or without a guard) when the engine is running.
