Product Solutions Driving Success

Since 1969, Belanger, Inc. has prided itself on manufacturing quality vehicle wash systems and components. With an extensive line of vehicle wash systems, including touch free and cloth configurations, Belanger continuously strives to stay ahead of the trends and excel in innovative technology and customer satisfaction. Each and every aspect of a Belanger product is carefully thought through to deliver reliability, durability, and serviceability in the simplest, most operator friendly means possible. Our primary source of innovation, enhancement, and new design inspiration are the users of the products themselves.

"Our customers generate a steady stream of great ideas and suggestions which regularly surface in the heart of their car wash operations. These ideas become the flash points of product enhancement and new product innovation. We are significantly grateful to our customers that our deliberate focus on their success has become the driving force of our own."

Belanger and our extensive worldwide distributor network are committed to your business's success. From business planning, installation, scheduled maintenance, complimentary system training, and emergency repair service, we want to be your complete business partner for the life of your wash.

Belanger's DuraTrans® XD

The conveyor is the lifeline of any tunnel car wash. If your conveyor goes down, your business revenue comes to a screeching halt along with it. Therefore, when it comes to conveyor selection, you want to choose the system that provides the highest level of reliability and the quickest serviceability to keep you successfully processing vehicles.

The DuraTrans® XD is the most advanced conveyor available in the industry today. Every aspect of the DuraTrans® XD was carefully thought through to deliver the most complete performance features available with the highest simplicity and most operator friendly functionality possible. The design process began with intensive focus group surveys with dozens of operators, distributor principals, and service personnel. We listened, questioned, and designed until we had it just right. As a result, the very distinctive DuraTrans® XD design emerged, rich in ground-breaking functionality and user-friendly capabilities that exceeded all industry expectations.

The DuraTrans® XD is truly unique with revolutionary features that deliver ...

- Reliable Vehicle Processing
- Cost Effective Maintenance
- User Friendly Serviceability

Don't waste another dollar of profit on lost precious time. Reduce your downtime and eliminate time-consuming maintenance. Call Belanger today and discover how the DuraTrans® XD is helping conveyor operators run smarter, and with more confidence, so they can get back to what's important ... reliable vehicle processing.
