

# Prep Jet System™

Many wash operators choose to manually prep the most heavily soiled vehicles before the wash process. Doing so helps ensure the best wash result for every customer while supplying the automated wash equipment with a consistent 'starting point' that helps it perform at its peak wash efficiency.

For these applications, Belanger offers the Prep Jet System™. Built to fit in space-limited loading areas, it occupies just over 5 square feet. Small on space but big on power, the system includes two holders and gun wands, each delivering 1000 PSI @ 8 GPM – more than *twice* the power of an average self-service wash wand.

To achieve this, the Prep Jet System™ is powered by a proven workhorse – a genuine 7-1/2 HP CAT 560 Series Pump. This is the 'heart and soul' of the Prep Jet System™, and it enables two workers to simultaneously prep the vehicle for maximum pre-cleaning, even in high-throughput environments.

Because effective prep work relies on a steady supply of properly mixed cleaning solution, the Prep Jet System™ also includes an on-board solution tank with HydroMinder™. This ensures a consistent delivery of cleaning solution, with true 'set and forget' calibration of the correct dilution ratio.

# Prep Jet System™

## REQUIREMENTS

### Physical

Unit Height	54"
Unit Width	30-1/2"
Unit Depth	24"

### Utilities

Electrical Requirements

7-1/2 HP, 3-Phase, 208/240/480 VAC  
120 VAC single phase for control system

Water Requirements

3/4" Feed @ 8 GPM @ 1000 PSI Fresh Water
