

Indoor Air Quality Services

The quality of indoor air is paramount to comfort and health of building occupants. Questions can arise regarding adverse health effects due to suspected contaminants such as volatile organic compounds, dust, asbestos, lead and mold. Resolution, Incorporated is experienced in responding to suspect air quality issues by offering the following IAQ services:

- Air Quality Investigations
- Identification of Contaminant Sources
- Direct Measurement of Indoor Air Contaminants
- Building and Ventilation Surveys
- Ventilation Systems Testing
- Sample Collection and Analysis in accordance with EPA and NIOSH Methods
- Recommendations for Hazard Control
- Administrative and Work Practice Recommendations
- LEED Sampling
