HISTORY OF ACTIVE DOOR & WINDOW COMPANY

Active Door & Window Company was founded in January, 1967 by Bob Volk Sr. and his wife Emma. It began with one pick-up truck and the warehouse was Bob's garage in West Islip, Long Island, New York. Rapidly it developed into a larger business as his three sons, then of school age, helped out on weekends, etc. All three sons, Bob, Bill and Ed, entered the business as they graduated school and helped bring the business in New York to what it is today, with two locations in Long Island, New York and 30 employees.

Bob Sr. and his wife bought a home in Punta Gorda, Florida in 1987, leaving their three sons in charge of the business in New York. In 1991, Bob opened the Punta Gorda location and his son Ed came to Florida to help run this operation. This business progressed so rapidly, it now employs 30 people and has two showrooms and a 12,000 sq. ft. warehouse in Punta Gorda.

Ed Volk is now owner of the Florida operation. His two sons, Matt and Ed, are also helping dad run the business.

The Volk's family secret to success—
Hard work, excellent service, quality products
and fair prices.

ED VOLK
President

▲ ***Four Panel Garage Screen***

Available with 18x14 or 20x20 screening

A unique item for Florida residents is the garage screen. It provides cross ventilation while keeping out unwanted pests and debris.

Two styles are available: the motorized roll-up screen is out of your way and convenient. The sliding screen type is economical and easy to maintain. You will wonder how you ever lived without one!! Full size models of both may be seen at either of our two convenient locations.

HURRICANE & SECURITY PROTECTION

Living here in Florida we should prepare our homes for the possibility of a hurricane. At Active Door & Window we are the experts and can help you with the type of protection you need for your home.

Roll down & accordion shutters, aluminum, clear storm panels and wind abatement screens are all on display in our showrooms and are installed by our own trained professionals.

Garage doors are the weakest point of entry during a hurricane. Active Door & Window provides retro-fit protection for existing doors and wind-loaded replacement doors and new construction.

Hurricane Protection

ROLLING HURRICANE SHUTTERS

These rolling shutters offer utmost protection during severe storms and hurricanes. Protection from burglars and vandals are another feature that make these ideal for your home.

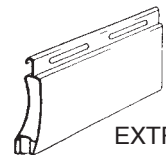

Rolling shutters give you privacy when desired and will block out unwanted sun in summer to reduce cooling bills.

Active's accordion shutters are designed to protect from winds up to Category 5 Hurricane force winds. Ease of operation is achieved with steel wheel carriages, nylon wheels and reinforced ribs for extra strength.

Accordion track can be curved up to 90° to allow shutters to bend around any corner.

Accordions can stack in as little as 1" per foot of coverage

Shutter can be stacked conveniently to one side or both sides for compact storage. Inside or outside locking system for security. Ideal for private homes, condos or business.

Hurricane Protection ACCORDION SHUTTERS

Hurricane Protection BAHAMAS AND SCREENS

Bahama shutters and awnings are very popular in Southwest Florida because they serve multiple purposes. They are decorative, provide shading plus withstand 120 mph winds for storm protection. They are both available in a large assortment of colors to match your decor.

Bahama shutters are available with 2-slat positions for privacy and viewing. Come in and see full-size displays in both of our showroom locations.

Wind abatement screens, an economical and practical choice.

Hurricane Protection

IMPACT RESISTANT WINDOWS & DOORS

Hurricane Charley, which caused such massive damage to Punta Gorda and Charlotte County, Florida in 2004, taught researchers that violent winds alone are not the major cause of window breakage. The real cause is flying objects. As a result, codes for hurricane protection now focus on **impact protection** for windows and doors, not just wind velocity. PGT Impact Resistant Windows and Doors provide state-of-the-art impact protection. They combine heavy-duty aluminum frames with KeepSafe Maximum™ glass. A special silicone glazing process helps keep the glass from breaking away from the frame. Although the glass may crack on impact, the interlayer helps the glass remain intact, not allowing destructive wind into the home.

KeepSafe Maximum™ Glass

This remarkable product is comprised of two glass panes bonded with a special interlayer of clear polyvinyl/butylal. It provides amazing protection.

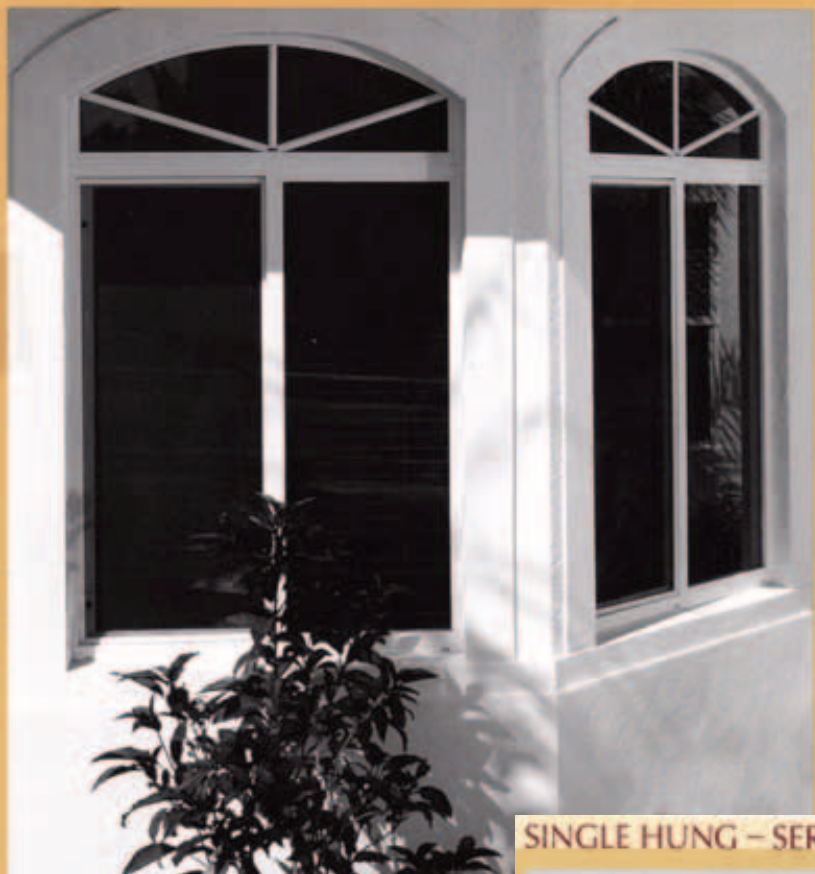

Large Missile Impact Testing

A window is subjected to two impacts by a nine pound 2x4 beam traveling at a speed of 50 feet per second. Then this "impacted" window is subjected to hurricane force winds.

DON'T LET THIS HAPPEN TO YOU

Let us brace your garage door to withstand hurricane force winds.

GARAGE DOOR HURRICANE-READY SYSTEM

Pictured below is a 16' wide, 7' high door. The required wind-load protection varies by door style as well as other building factors. A 2-5/8' deep U-bar reinforcement is attached for wind-load protection. The number of U-bars supplied depends on specific wind-load requirements and door size. Removable post (not pictured) can be added for additional protection if desired.

Gentlemen:

I am writing to tell you how pleased I am with your installation of storm shutters at my home on Rio Plato Drive. Your pricing was more than competitive, the shutters are beautiful, but I was most impressed with your people and your service.

Your crews did what you said they would do when you said they would do it.... all in an efficient and professional manner. I cannot get over how polite each and every worker on this job was. Please tell them that customers do notice how people conduct themselves on the job. Your people were great on this job.

Feel free to use me as a reference in the future.

Sincerely,

 David A. Rooney, CPA

Dear Ed:

Enclosed is our check representing payment in full for the scope of work contained in our August contract. I suspect that prompt payment in full conveys the depth of our appreciation to you for the quality of your work.

Before we signed with Active we had quotes from several other vendors. We insisted that the product custom fabricated and installed in our home be in accordance with the stringent Dade County Code. Many of the potential vendors made a claim, you were able to document your work product conforms. How else can we judge who is the "best contractor" to select? Your salesman came when he said he would come. He knew his product. He was thorough. He was competent. When we were ready to place the order you came to our home to make precise measurements to verify the most effective way of installing the custom accordion shutters. Your suggestions were well taken. Your installers arrived on the scheduled date. The work was completed in advance of your promise to us. By any yardstick that confirms that you continue to build your reputation on every job every day.

We have no hesitation in recommending Active. I was home when the Punta Gorda Building Inspector came to our home yesterday. He approved your work without any reservation. In your industry one has to be like Diogenese holding a lamp looking for the "honest man." We suggest that those who are seeking honesty in your field look to Active. We did. We are more than satisfied.

Sincerely,
Dr. Paul E. Pritzker, P.E., PhD
