Adjustable Beds

Niagara adjustable beds have been around for over 50 years. There are several different mattress options available to you and they all have the patented soothing massage feature. This bed offers you the ability to manipulate your body to relieve pressure points while you rest. If you haven't had a good nights sleep in a while, try our adjustable beds. You won't believe how relaxed you are in the morning.

This amazing bed aids in the relief of many things like a hiatal hernia and relieving the pressure in your legs by raising them up to reduce the swelling in your legs. The soothing massage helps stimulate the body and blood circulation which in turn enhances muscle relaxation. Once you try an adjustable bed, you'll wonder what took you so long.
