HOW
YOU CAN GET ACCESS TO THIS INFORMATION.PLEASE REVIEW IT CAREFULLY.*

1. ***Purpose of this Notice.*** In general, any information that concerns your health, health care or payment for that care, is considered confidential and protected by ASHTON FAMILY MEDICINE. This Notice describes ASHTON FAMILY MEDICINE'S privacy practices, specifically how we use and disclose your medical information and what rights you have with respect to this information. This information may include your name, address, and other identifying data, or information on your health or the health services that you have been or may be furnished to you. ASHTON FAMILY MEDICINE requires that all of its divisions, employees, staff, volunteers and independent contractors comply with these privacy practices with respect to medical information that is used or disclosed by ASHTON FAMILY MEDICINE.

You should read this Notice before signing the ASHTON FAMILY MEDICINE patient registration form HIPPA consent. Please feel free to contact our office manager to discuss any privacy practice or this Notice.

2. ***The Use and Disclosure of Medical Information for Treatment, Payment and Health Care Operations.*** By law ASHTON FAMILY MEDICINE is allowed to use and disclose your medical information for most treatment, payment and healthcare operations purposes once we have obtained from you a signed Consent.

Treatment means provision, coordination or management of health care and related services by or involving ASHTON FAMILY MEDICINE, such as the coordination of consultations and referrals. Thus, with your Consent, ASHTON FAMILY MEDICINE can share most medical information regarding your health condition with another provider as part of a consultation. [Also, related to your treatment, ASHTON FAMILY MEDICINE may contact you to remind you to make or that you already made an appointment; to notify you regarding treatment alternatives or other health-related benefits and services that may be of interest to you.]

Please note that by law certain medical information, such as psychotherapy notes, normally may not be used or shared based on your Consent, even when it is related to your treatment. Instead, we need to obtain Authorization (a stricter form of permission) to specifically use or release that information.

Payment primarily means ASHTON FAMILY MEDICINE activities related to getting reimbursed services provided to you. However, payment can also cover activities to determine your eligibility for services with your insurer, coordination of benefits with other insurers, billing, claims management, collection, medical necessity review activities, utilization review activities, and disclosure to consumer reporting agencies. For instance, with your Consent, we can disclose to your health plan medical information that is required by the plan to determine

whether the services we have provided to you are medically necessary.

Health care operations cover a range of ASHTON FAMILY MEDICINE activities that are necessary to our operations. They may be performed by ASHTON FAMILY MEDICINE or, in some cases, by third-party contractors. They include quality assessment and improvement activities; peer review; credentialing and licensing; training programs; legal and financial services; business planning and development; management activities related to our privacy practices; customer services; internal grievances; creating de-identified information for data aggregation or other purposes; fundraising; certain marketing activities; and due diligence activities. An example of our operations is evaluating practitioners performance to insure that they meet our quality standards. Engaging counsel to defend our practice in a legal action is another type of operations.

3. ***The Use and Disclosure of Medical Information Without Your Consent, Authorization or Other Permission.*** Under certain circumstances, ASHTON FAMILY MEDICINE may use or disclose your medical information without a Consent, Authorization or other written permission from you. These circumstances are as follows:

a. ***To a Relative, Friend or Individual Involved in Your Care, or for Disaster Relief.*** ASHTON FAMILY MEDICINE may provide medical information about you to your relative or friend, or another individual involved in your care. We will attempt to seek your permission to make this disclosure. If we are not able, for instance, because of your condition or because you are not immediately present, we will use our best judgment to determine whether you would want this information shared.
