Minn. Western Plow Dealers Celebrate With 5-Plow Giveaway

Minnesota's Western Plow Dealer Network helped Western Products celebrate its newly expanded line of snow plows with Western's 5-Plow Giveaway of new snow plows in 2013.

The Western 5-Plow Giveaway will award one new plow per month, August through December. The Western snow plow models included in the sweepstakes are:

August: Pile Driver containment plow

September: HTS half-ton snowplow

October: Pro Plus straight-blade snowplow

November: Prodigy multi-position wing plow

December: MVP 3 V-plow

To enter, contestants must sign up each month for a chance to win that month's plow. Fans can double their chances of winning each month by signing up on both the Western plows Web site and

Facebook page. One winner's name will be drawn at the beginning of every month and announced on the Western Facebook page.

Aspen Equipment Co. sales manager Kevin Dessart said, "I am proud to stock a massive inventory of all the new Western plows so customers can call or come in to one of our Minnesota dealers and we can fit them with the best plow for their needs. The 5-Plow Giveaway is a great way to learn about the exciting new products from Western and Minnesota's Western Plow Dealer Network is ready to help customers purchase the right plow and provide after sale service and parts."

(L-R): Aspen Equipment's Kevin Dessart, Mitch Buzzo and Aaron Carlson stand by a new MVP 3 V-Plow, which is the giveaway model for December.

SnowEx Launches Enhanced SuperMaxx II Spreaders

SnowEx has released its SuperMaxx II spreaders for ice management. Available with 3.3-, 4.3- and 6.0-cu.-yd. (2.5, 3.3 and 4.6 cu m) capacities, the units are engineered for pre-wetting integration and optimal weight distribution, making them ideal for large contractors and municipalities, according to the manufacturer.

SuperMaxx II spreaders feature an enhanced material feed system with a new stainless steel trough, where brine and salt are mixed before being delivered to the spinner.

The spreaders also feature cab-forward hoppers with up to 33-percent better payload distribution, resulting in improved safety and reduced stress on the carrying vehicle. The hoppers are made from lightweight, corrosion-resistant polyethylene and include a multi-angle design to

promote a continuous flow of material to the auger feed system. Furthermore, an inverted "V" baffle and attached vibrator reduce

clumping and allow the units to spread all bulk materials, including 100-percent salt, 100-percent sand and any combination in between.

With a variable spread width up to 40 ft. (12 m), the SuperMaxx's 12-in. (30.5 cm) stainless-steel spinner contains adjustable cups for maximum control over the spread pattern. When not in use, the modular, low-profile spinner assembly can be flipped into the upright position, providing full access to the vehicle's hitch.

Also included is a pendant-style controller with a digital readout and dials for independently adjusting the variable-speed spinner and auger. It comes with blast and pulse features, as well as auto-reverse and overload protection. If the truck is equipped with a SnowEx pre-wetting system, the controller can toggle it on and off,

automatically adjusting the flow of brine according to the spreader's material feed rate.

SuperMaxx II spreaders are completely electric-powered with a 12-volt, 3/4-hp auger motor and 1.6-hp spinner motor. To ensure durability and ease of maintenance, the motor and transmission are sealed within a weather-resistant enclosure. The control panel also is protected in a weather-resistant enclosure with a clear inspection cover.

Other standard features include a fitted tarp, top screen, LED safety strobe lights, noncombustible wiring and vertically oriented ratchet straps. The spreaders are covered by a two-year warranty.

For more information, call 800/725-8377 or visit www.snowexproducts.com.
