

Dear Families,

We are writing to let you know of some exciting changes that we are implementing here at Adventure Kids. We have redesigned our curriculum!! This new curriculum allows for more exploration and creativity for our students while streamlining the themes for our teachers.

The new curriculum has changed in its' visual appearance, but not in its' content. We have enriched the curriculum by adding various new science and social studies topics along with our existing subjects. Things such as Sight Words and Sign Language signs will now be intertwined more with our weekly/monthly themes.

Your child's day will include: Circle Time, Communication and Language, Creative Expression, Fine Motor, Gross Motor, Logic and Math, Science and Nature, Sensory Exploration, and Social Interaction. We are now using an online Planbook to organize our lesson plans. Each week, we will print the weekly plan and post it as usual for your viewing.

We have also said goodbye to our Author of the Month because our books will now be based on our themes rather than focusing on one author. We have also decided to go through the alphabet in letter order each month instead of random letters. (A, B, C, etc...)

Last but not least, in order to make your child's transition between the two school locations smoother, we have decided to use the same curriculum at both locations. This way when your child goes to our Pleasant St. location, they will be learning by using the same curriculum they are accustomed to, but at a more age appropriate level preparing them for kindergarten.

We hope you will enjoy this new and improved curriculum. We are confident it will build on what we were previously using, making each student better equipped and prepared for the continuation of their academic journey.

If you have any questions or concerns, please let us know!
